

Simple AWS EC2 & S3 Instructions for Clients

This document provides a simple, client-friendly instruction on how to buy AWS services and how to share the necessary information with developers to host the project.

1. Buy AWS Services (Client Steps)

Step 1: Create an AWS Account

- Go to <https://aws.amazon.com>
- Create an account using your email
- Add billing information (Debit/Credit card)

Step 2: Sign in to AWS Console

- Login to the AWS Management Console

Step 3: Buy EC2 Hosting

- Search "EC2" in the AWS Console
- Click "Launch Instance"
- Choose: Ubuntu 22.04 or Amazon Linux 2
- Instance Type: t2.micro (or higher if needed)
- Create a Key Pair (download .pem file)
- Launch the instance

Step 4: Buy S3 Storage

- Search for "S3"
- Click "Create Bucket"
- Enter bucket name
- Choose region
- Create bucket

2. Information Developer Needs

After you buy the services, please send the following information to your developer:

EC2 Information:

- EC2 Public IP Address
- EC2 Username (ubuntu or ec2-user)
- EC2 Key Pair (.pem file)

S3 Information:

- Bucket Name
- Bucket Region

IAM Credentials (Optional but recommended):

- Access Key ID
- Secret Access Key

Without these details, developers cannot set up hosting.

3. What Developer Will Do

After receiving the information, developers will:

- Connect to EC2 server
- Install required software (Node.js, Nginx, Database, etc.)
- Upload project files
- Configure S3 for image/file uploads
- Configure domain & SSL
- Launch the project live

4. Important Notes

- Client only needs to buy EC2 and S3.
- Developer will handle all technical setup.
- Make sure billing alerts are enabled to avoid extra charges.
