PROFESSIONAL SUMMARY

Full-Stack Engineer with 1.5 years of experience building scalable web applications and implementing DevOps and Cloud Engineering practices. Skilled in the MERN stack, Next.js, and deploying production-ready infrastructure on AWS. Experienced in optimizing DevOps workflows through Docker containerization, automated CI/CD pipelines, Infrastructure as Code (IaC), and cloud deployment best practices to improve scalability, reliability, and software delivery speed.

TECHNICAL SKILLS

- **DevOps & Cloud Engineering:** Docker, Kubernetes (K8s), AWS (EC2, S3, IAM, Lambda, CloudWatch), CI/CD (GitHub Actions, Jenkins), Terraform (Basics), Nginx, Linux (Ubuntu), Grafana, Prometheus
- **Backend:** Node.js, Express.js, RESTful API, MongoDB, Mongoose, JWT Auth, PostgreSQL
- **Frontend & Mobile:** React.js, Next.js, React Native, TypeScript, Tailwind CSS, Redux Toolkit
- **Tools & Monitoring:** Git, GitHub, Postman, Firebase, Vercel, Render

PROFESSIONAL EXPERIENCE

Full Stack Developer at Spark Tech Agency

Dhaka, Bangladesh — Dec 2024 – Present

- Drive end-to-end delivery of web and cross-platform applications from client UI to cloud operations.
- Build secure, modular RESTful APIs and optimized database schemas using Node.js, Express, MongoDB, and PostgreSQL.
- Containerize multi-tier web applications using Docker and manage optimized images via Docker Hub.
- Design automated CI/CD pipelines via GitHub Actions for testing and production deployment on AWS EC2, cutting manual effort by 40%.
- Implement production-grade application logging and monitoring using AWS CloudWatch to maximize uptime.

DEV-OPS & FEATURED PROJECTS

Yard Heroes

[Live Site](#)

Full-Stack Web Application (React.js + Node.js + AWS EC2)

- Engineered responsive multi-role user interfaces and frontend components using React.js and Tailwind CSS.
- Developed scalable API endpoints and secure authentication/payment architectures on Node.js backend.
- Containerized full-stack system using Docker to eliminate environmental inconsistencies between dev and hosting.
- Provisioned and deployed containerized builds directly onto AWS EC2 instances for reliable lifecycle management.

AIMentor (AI-Powered Learning Assistant)

[Project Demo](#)

Serverless AI Application (React + AWS Lambda + OpenAI)

- Built an AI-powered learning platform that enables students to upload study materials, generate AI-powered summaries, create flashcards, take quizzes, and track learning progress.
- Designed a scalable serverless backend using AWS Lambda (Node.js 22), Amazon API Gateway, Amazon S3, DynamoDB, and CloudWatch.
- Developed a responsive React + Vite frontend deployed on AWS EC2 with Nginx and integrated the OpenAI API with a built-in mock mode to reduce development costs.
- Automated infrastructure provisioning using AWS SAM and CloudFormation and implemented CI/CD pipelines with GitHub Actions for seamless deployments.

CERTIFICATIONS

DevOps and Cloud Engineering

bongoDev

EDUCATION

University of South Asia

Dhaka, Bangladesh

B.Sc. in Computer Science & Engineering
