

MD MEHEDI HASAN

Full-Stack Software Engineer

Dhaka, Bangladesh • mdmehedihasandev0@gmail.com • +880-1703946056

[LinkedIn](#) • [GitHub](#)

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with over 1.5 years of experience architecting and shipping responsive web and mobile applications using the MERN stack, Next.js, and React Native. Expert in designing secure RESTful APIs, optimizing complex database schemas, and streamlining modern deployment lifecycles using Docker and automated CI/CD pipelines on AWS. Passionate about building performant, scalable, and high-impact software solutions.

TECHNICAL SKILLS

- **Backend Development:** Node.js, Express.js, RESTful API Design, JWT Authentication, System Architecture
- **Database Systems:** MongoDB, Mongoose ODM, PostgreSQL, Database Optimization & Profiling
- **Frontend & Mobile Integration:** React.js, Next.js, React Native, TypeScript, Tailwind CSS, Redux Toolkit, Vite
- **DevOps & Cloud Infrastructure:** AWS (EC2, S3, IAM, Lambda, CloudWatch), Docker, GitHub Actions, Nginx, Linux (Ubuntu)
- **Tools & Verification:** Git, GitHub, Postman, Firebase, Vercel, Render

PROFESSIONAL EXPERIENCE

Full Stack Developer at Spark Tech Agency

Dhaka, Bangladesh — Dec 2024 – Present

- Drive end-to-end engineering of multi-tier web and cross-platform mobile applications from pixel-perfect UI to production cloud infrastructure.
- Build secure, modular RESTful APIs and optimized SQL/NoSQL database schemas using Node.js, Express, MongoDB, and PostgreSQL.
- Containerize multi-tier application architectures using Docker to guarantee local and remote environmental consistency.
- Architect automated CI/CD automation pipelines via GitHub Actions, executing test scripts and continuous deployments directly to AWS EC2 instances, decreasing manual engineering overhead by 40%.
- Integrate AWS CloudWatch alongside Linux system monitoring tools to dynamically track application uptime and diagnose server runtime logs.

FEATURED PROJECTS

Yard Heroes

[Live Site](#)

Full-Stack Multi-Role Service Marketplace (React.js + Node.js + AWS EC2)

- Engineered high-fidelity, responsive multi-role user dashboards and structural layout components using React.js and Tailwind CSS.
- Developed secure, scalable backend APIs, user group authentications, and data transmission models using Node.js and Express.
- Wrapped full-stack systems within multi-container environments using Docker Compose to isolate code dependencies.
- Deployed optimized system builds behind an Nginx reverse proxy on highly available AWS EC2 instances.

AIMentor (AI-Powered Learning Assistant)

[Project Demo](#)

Serverless AI Web Application (React + AWS Lambda + OpenAI API)

- Developed an interactive learning ecosystem enabling users to sync documents, execute text parsing, and generate custom AI flashcards and quizzes.
- Designed a highly cost-efficient serverless backend leveraging AWS Lambda (Node.js 22), API Gateway, Amazon S3, and DynamoDB.
- Crafted a slick React + Vite UI layout, integrated OpenAI API, and deployed assets using an automated infrastructure pipeline with AWS SAM and CloudFormation.

EDUCATION

University of South Asia

B.Sc. in Computer Science & Engineering

Dhaka, Bangladesh
